Lens Colours available:

Features and benefits:

- Low profile unit with aerodynamic efficiency and unobtrusive styling
- Low current draw (approximately 20% of a standard lightbar a standard 12 volt rotator draws 5 Amps, an LED module draws 0.2 Amps)
- Long service life due to LED technology and no moving parts
- LEDs rated to 100,000 hours of operation
- Solid state encapsulated electronics
- Weather-proof housing
- 360 degrees light output with increased vertical dispersion at peak output
- Meets strict European EMC directives

*5 year warranty on LED components

Construction:

- Polycarbonate lens with aluminium extrusion for strength and durability
- Plug in wiring harness for easy installation
- Unique mounting allows for a neat fit to the roof of the vehicle
- Height (centre) 53mm Width (centre) 305mm
- Lengths available: 810, 1070, 1200, 1330, 1460, 1590, 1720, 1850 and 1980mm

Electrical:

- Units available in 12 or 24 volt
- May be controlled by conventional switches, relays or an integrated siren/amplifier switch (such as 809-001)
